

false, deceptive, and misleading because the Products contain wheat dextrin, a non-natural, synthetic ingredient.

3. On May 14, 2020, the National Advertising Division (“NAD”), a Better Business Bureau nonprofit program charged with monitoring and evaluating truth and accuracy in national advertising, conducted an investigation and determined that wheat dextrin, which is created from wheat starch through a multi-step chemical process involving hydrochloric acid, is not a natural ingredient. Accordingly, NAD concluded that Defendant’s “100% Natural” label was misleading to a reasonable consumer and should be discontinued. (NAD’s Ruling is attached hereto as **Exhibit A**).

4. Plaintiff and those similarly situated (“Class Members”) relied on Defendant’s misrepresentations that the Products are “100% Natural” when purchasing the Products. Plaintiff and Class Members paid a premium for the Products based upon their “100% Natural” representation. Given that Plaintiff and Class Members paid a premium for the Products based on Defendant’s misrepresentations that they are “100% Natural,” Plaintiff and Class Members suffered an injury in the amount of the premium paid.

5. Defendant’s conduct violated and continues to violate, *inter alia*, New York General Business Law §§ 349 and 350, and the consumer protection statutes of all 50 states Defendant has been and continues to be unjustly enriched. Accordingly, Plaintiff brings this action against Defendant on behalf of herself and Class Members who purchased the Products during the applicable statute of limitations period (the “Class Period.”)

FACTUAL BACKGROUND

The Natural Supplements Industry

6. Consumers have become increasingly concerned about the effects of synthetic and chemical ingredients in food and other consumable products. Companies such as Defendant have capitalized on consumers' desire for purportedly "natural" products. Indeed, consumers are willing to pay, and have paid, a premium for products branded "natural" over products that contain synthetic ingredients. In 2015, sales of natural products grew 9.5% to \$180 billion.¹ Reasonable consumers, including Plaintiff and Class Members, value natural products for important reasons, including the belief that they are safer and healthier than alternative products that are not represented as natural.

7. The nutritional supplements industry in particular is big business. In 2019, there were more than 5,500 vitamin and dietary supplement launches globally² and the global supplements market was valued at \$80.3 billion USD.³ Products focused on digestive health are among the most popular supplements, with global sales of \$7.11 billion USD.⁴ American

³ *Id.*

⁴ *Id.*

consumers are particularly health-conscious and are increasingly turning to supplements to prevent and treat illness.⁵ In 2019, dietary supplement sales throughout the United States totaled more than \$39 billion.⁶

8. Conditions in the industry have created the perfect storm for unscrupulous supplement makers, like Defendant, to take advantage of consumers. The reasonable consumer lacks the equipment and specialized knowledge and training necessary to test supplement makers' claims and to evaluate the safety of their products. The U.S. Food and Drug Administration ("FDA") lacks the resources to enforce its laws against most supplement makers. Thus, companies drawn to the industry by increasingly attractive sales numbers are able to gain market share and increase their profits by misleading consumers about the quality and benefits of consuming their product(s).⁷ Defendant's deceptive acts and practices and false advertising exemplify this ongoing epidemic that has plagued consumers throughout the country.

9. Despite the Products containing wheat dextrin, a synthetic ingredient, Defendant markets the Products as being "100% Natural." The Products' labeling is depicted below:

Benefiber Original Prebiotic Powder

Synthetic Ingredient:

Wheat Dextrin

Benefiber Healthy Shape Prebiotic Powder

Synthetic Ingredient:

Wheat Dextrin

10. Defendant's representations that the Products are “100% Natural” is false, misleading, and deceptive because the Products contain wheat dextrin, a synthetic ingredient.

11. Whether Defendant’s labeling of the Products as natural is deceptive is judged by whether it would deceive or mislead a reasonable person. To assist in ascertaining what a reasonable consumer believes the term natural means, one can look to the regulatory agencies for their guidance.

12. Earlier this year, Defendant’s competitor Procter & Gamble brought a case before the NAD. On May 14, 2020, NAD issued a ruling concluding that the chemical process used to produce the wheat dextrin found in the Products was “inconsistent with the reasonable consumer takeaway” of the “100% Natural” representation on the Products.⁸

13. NAD reached this conclusion by reviewing the complex chemical process used to produce the wheat dextrin in the Products.⁹ The process begins with wheat starch, a carbohydrate derived from wheat. Hydrochloric acid is added to the wheat starch and the starch is then heated to a high temperature, which creates new bonds between the glucose sugars. Next, an enzyme, α -amylase, is added to the mixture, which further reduces the molecular weight of the polymer chains. After the enzyme is added, the preferred polymers are selected, collected from the mixture, filtered to remove impurities, then concentrated to remove water and increase the concentration of polysaccharides to transform the solution into a dry powder. Then, the substance is subjected to chromatography which allows the manufacturer to select specific polysaccharides by molecular

⁸ Exhibit A, p. 7.

⁹ *Id.* at p. 2.

weight to alter the weight distribution of the mixture and allows for the removal of small sugar molecules, which further increases the fiber content of the mixture. Finally, the product is purified by ion exchange, evaporated and then spray dried to product the final wheat starch ingredient found in Benefiber.

14. As NAD noted, “the process of manufacturing Benefiber transforms the source ingredient – wheat starch – which is digestible and has 0% dietary fiber, into a new ingredient – wheat dextrin – which is non-digestible and has 85% dietary fiber.”¹⁰

15. Upon consideration of the chemical process used to create wheat dextrin, NAD concluded that reasonable consumers would not consider the Products to be “100% Natural” because “ingredients that are derived from nature and undergo significant chemical alterations are often not ‘natural’ in the way that consumers expect them to be.”¹¹ This is especially true of products that are labeled as “100% Natural” because “‘100% Natural’ is a powerful claim that promises to deliver a substance that is entirely natural. Even assuming that consumers understand that many foods undergo some degree of processing before reaching them, a ‘100% Natural’ claim reasonably conveys that the product is entirely natural and, if any processing is required to bring the product to market, such processing is minimal.”¹² The creation of the wheat dextrin in Benefiber does not involve “minimal processing” but rather “a multi-step process that utilizes hydrochloric acid, added enzymes and a tailored, highly controlled method, which selects for

¹⁰ *Id.*

¹¹ *Id.* at p. 3.

¹² *Id.* at p. 4.

biological properties that resist digestion, increases fiber content, enhances solubility, lowers viscosity and adds sweetness to the product marketed to consumers.”¹³

16. Moreover, Benefiber is the subject of a patent, which states that the purpose of the usage of heat during the patented process is “to obtain a significant transformation of the structure of the product.” And, Defendant’s own Generally Recognized as Safe (“GRAS”) Notification submitted to the FDA also details the degree of processing and transformation of the wheat dextrin in Benefiber: “[I]s a specialty dextrin that is produced using a highly controlled process of starch dextrinization followed by enzymatic treatment and column chromatography. This process produces a highly indigestible, soluble dextrin, with a higher fiber content and a desired narrower molecular weight distribution.”¹⁴

17. The complex chemical process used to create the wheat dextrin in the Products is not superfluous. Rather it is integral to conferring the benefits that consumers desire including its high fiber content, viscosity, solubility, and sweetness.¹⁵

18. NAD also rejected Defendant’s argument that wheat dextrin is “natural” under FDA or Federal Trade Commission (“FTC”) precedent.¹⁶ Specifically, NAD noted that “the FDA has not promulgated a definition of natural and instead has made clear that the informal guidance on which GSK relies does not establish the contours of an advertiser’s non-misleading use of the term. Moreover, as NAD has articulated in prior cases, simply because federal regulations do not explicitly prohibit labeling a product as ‘natural’ does not mean such claims will meet the standards

¹³ *Id.*

¹⁴ *Id.*

¹⁵ *Id.* at p. 5.

¹⁶ *Id.* at p. 6.

imposed by advertising law (i.e., that they be truthful, accurate and not misleading).” Moreover, The FDA’s *Review of the Scientific Evidence on the Physiological Effects of Certain Non-Digestible Carbohydrates* expressly calls wheat dextrin a “synthetic” non-digestible carbohydrate.¹⁷

19. Based on this analysis, NAD recommended that the advertiser’s “100% Natural” claim be discontinued.¹⁸

20. NAD’s determination that wheat dextrin is synthetic is supported by guidance provided by the U.S. Department of Agriculture (“USDA”). In 2013, the USDA issued a Draft Guidance Decision Tree for Classification of Materials as Synthetic or Nonsynthetic (Natural). In accordance with this decision tree, a substance is natural—as opposed to synthetic—if: (a) it is manufactured, produced, or extracted from a natural source (i.e. naturally occurring mineral or biological matter); (b) it has not undergone a chemical change (i.e. a process whereby a substance is transformed into one or more other distinct substances) so that it is chemically or structurally different than how it naturally occurs in the source material; or (c) the chemical change was created by a naturally occurring biological process such as composting, fermentation, or enzymatic digestion or by heating or burning biological matter. **(Exhibit B).**

21. Congress has defined “synthetic” to mean “a substance that is formulated or manufactured by a chemical process or by a process that chemically changes a substance extracted from naturally occurring plants, animals, or mineral sources.” 7 U.S.C. § 6502 (21).

¹⁷ *Id.*

¹⁸ *Id.* at p. 7.

22. A Technical Evaluation Report of “Dextrin” Compiled by the Technical Services Branch for the USDA National Organic Program (“the Report”)¹⁹ describes dextrin as “partially hydrolyzed starch produced by a chemical process called hydrolysis.”

23. The Report further describes the multi-step chemical process for creating dextrin:

It is prepared by using dry heating or roasting unmodified starch with or without an acid or alkaline catalyst. The acid catalysts include hydrochloric, phosphoric, and nitric acid; the alkali catalysts include sodium hydroxide and hydrolysable salts of weak acids, such as carbonates, hydrogen carbonates, perchlorates, and hypochlorites

Unmodified starch is usually acidified with small amounts of acid and placed in heated, agitated vessels called reactors or roasters. The temperature is increased at a controlled rate and then maintained at a maximum temperature for varying lengths of time. The resulting product is cooled, blended, and sometimes aged.

A fluid bed technique can also be used. Unmodified starch is placed in a reactor and suspended or fluidized in a stream of heated air. The starch is then acidified and, as in the conventional or “roaster” process, heated under controlled conditions of time and temperature until the desired end product is attained. With the several degrees of freedom possible in such processes, a range of dextrin with widely varying properties is produced.

In some cases, starch is heated with acid and followed by enzymatic (amylase) treatment to form indigestible polysaccharides called resistant dextrin (including maltodextrin). Resistant dextrin is a class of soluble fiber.²⁰

24. Consumers lack the meaningful ability to test or independently ascertain or verify whether a product is natural, especially at the point of sale. Consumers would not know the true nature of the ingredients merely by reading the ingredients label.

¹⁹ Available at www.ams.usda.gov/sites/default/files/media/Dextrin%202010%20TR.pdf

²⁰ *Id.* (internal citations omitted).

25. Discovering that wheat dextrin not natural and are actually synthetic requires a scientific investigation and knowledge of chemistry beyond that of the average consumer. That is why, even though the wheat dextrin is identified on the back of the Products' packaging in the ingredients listed, the reasonable consumer would not understand – nor are they expected to understand - that this ingredient is synthetic.

26. Moreover, the reasonable consumer is not expected or required to scour the ingredients list on the back of the Products in order to confirm or debunk Defendant's prominent claims and representations that the Products are “100% Natural.”

27. Defendant did not disclose that wheat dextrin is a synthetic ingredient. A reasonable consumer understands Defendant's “100% Natural” claims to mean that the Products are “100% Natural” and do not contain synthetic ingredients.

28. Defendant has thus violated, *inter alia*, NY General Business Law § 392-b by: a) putting upon an article of merchandise, bottle, wrapper, package, label or other thing, containing or covering such an article, or with which such an article is intended to be sold, or is sold, a false description or other indication of or respecting the kind of such article or any part thereof; and b) selling or offering for sale an article, which to its knowledge is falsely described or indicated upon any such package, or vessel containing the same, or label thereupon, in any of the particulars specified.

29. Consumers rely on label representations and information in making purchasing decisions.

30. The marketing of the Products as “100% Natural” in a prominent location on the labels of all of the Products, throughout the Class Period, evidences Defendant’s awareness that “100% Natural” claims are material to consumers.

31. Defendant’s deceptive representations and omissions are material in that a reasonable person would attach importance to such information and would be induced to act upon such information in making purchase decisions.

32. Plaintiff and the Class members reasonably relied to their detriment on Defendant’s misleading representations and omissions.

33. Defendant’s false, misleading, and deceptive misrepresentations and omissions are likely to continue to deceive and mislead reasonable consumers and the general public, as they have already deceived and misled Plaintiff and the Class members.

34. In making the false, misleading, and deceptive representations and omissions described herein, Defendant knew and intended that consumers would pay a premium for Products labeled as being “100% Natural” over comparable products not so labeled.

35. As an immediate, direct, and proximate result of Defendant’s false, misleading, and deceptive representations and omissions, Defendant injured Plaintiff and the Class members in that they:

a. Paid a sum of money for Products that were not what Defendant represented;

b. Paid a premium price for Products that were not what Defendant represented;

c. Were deprived of the benefit of the bargain because the Products they purchased had less value than what Defendant represented;

d. Ingested a substance that was of a different quality than what Defendant promised; and

e. Were denied the benefit of the beneficial properties of the natural foods Defendant promised.

36. Had Defendant not made the false, misleading, and deceptive representations and omissions, Plaintiff and the Class members would not have been willing to pay the same amount for the Products they purchased.

37. Plaintiff and the Class members paid for Products that are “100% Natural” but received Products that are not “100% Natural.” The Products Plaintiff and the Class members received were worth less than the Products for which they paid.

38. Plaintiff and the Class members all paid money for the Products. However, Plaintiff and the Class members did not obtain the full value of the advertised Products due to Defendant’s misrepresentations and omissions. Plaintiff and the Class members purchased, purchased more of, and/or paid more for, the Products than they would have had they known the truth about the Products. Consequently, Plaintiff and the Class members have suffered injury in fact and lost money as a result of Defendant's wrongful conduct.

JURISDICTION AND VENUE

39. This Court has subject matter jurisdiction under the Class Action Fairness Act, 28 U.S.C. section 1332(d) in that: (1) this is a class action involving more than 100 class members; (2) Plaintiff is a citizen of the State of New York, Defendant GSK Consumer Health, Inc. is a citizen of the State of New Jersey; and (3) the amount in controversy is in excess of \$5,000,000, exclusive of interests and costs.

40. This Court has personal jurisdiction over Defendant because Defendant conducts and transacts business in the State of New York, contracts to supply goods within the State of New York, and supplies goods within the State of New York.

41. Venue is proper because Plaintiff and many Class Members reside in the Southern District of New York, and throughout the State of New York. A substantial part of the events or omissions giving rise to the classes' claims occurred in this District.

PARTIES

Plaintiff

42. Plaintiff is an individual consumer who, at all times material hereto, was a citizen of New York State. Plaintiff purchased the Products during the Class Period. The packaging of the Products Plaintiff purchased contained the representation that they were "100% Natural." Plaintiff believes that products that are labeled as "100% Natural" do not contain synthetic ingredients. Plaintiff believes a synthetic ingredient is formulated or manufactured by a chemical process or by a process that chemically changes a substance extracted from naturally occurring plant, animal, or mineral sources. If the Products actually were "100% Natural," as represented on the Products' label, Plaintiff would purchase the Products in the immediate future.

43. Had Defendant not made the false, misleading, and deceptive representation that the Products were "100% Natural," Plaintiff would not have been willing to pay the same amount for the Products, and, consequently, would not have been willing to purchase the Products. Plaintiff purchased, purchased more of, and/or paid more for, the Products than she would have had she known the truth about the Products. The Products Plaintiff received were worth less than the

Products for which she paid. Plaintiff was injured in fact and lost money as a result of Defendant's improper conduct.

Defendant

44. Defendant GSK Consumer Health, Inc. is a corporation with its principal place of business in Warren, New Jersey. Defendant manufactures, markets, advertises and distributes the Products throughout the United States. Defendant created and/or authorized the false, misleading and deceptive advertisements, packaging and labeling for the Products.

CLASS ALLEGATIONS

45. Plaintiff brings this matter on behalf of herself and those similarly situated. As detailed at length in this Complaint, Defendant orchestrated deceptive marketing and labeling practices. Defendant's customers were uniformly impacted by and exposed to this misconduct. Accordingly, this Complaint is uniquely situated for class-wide resolution, including injunctive relief.

46. The Class is defined as all consumers who purchased the Products anywhere in the United States during the Class Period (the "Class").

47. Plaintiff also seeks certification, to the extent necessary or appropriate, of a subclass of individuals who purchased the Products in the State of New York at any time during the Class Period (the "New York Subclass").

48. The Class and New York Subclass shall be referred to collectively throughout the Complaint as the Class.

49. The Class is properly brought and should be maintained as a class action under Rule 23(a), satisfying the class action prerequisites of numerosity, commonality, typicality, and adequacy because:

50. Numerosity: Class Members are so numerous that joinder of all members is impracticable. Plaintiff believes that there are thousands of consumers who are Class Members described above who have been damaged by Defendant's deceptive and misleading practices.

51. Commonality: The questions of law and fact common to the Class Members which predominate over any questions which may affect individual Class Members include, but are not limited to:

- a. Whether Defendant are responsible for the conduct alleged herein which was uniformly directed at all consumers who purchased the Products;
- b. Whether Defendant's misconduct set forth in this Complaint demonstrates that Defendant has engaged in unfair, fraudulent, or unlawful business practices with respect to the advertising, marketing, and sale of its Products;
- c. Whether Defendant made false and/or misleading statements to the Class and the public concerning the contents of its Products;
- d. Whether Defendant's false and misleading statements concerning its Products were likely to deceive the public;
- e. Whether Plaintiff and the Class are entitled to injunctive relief;
- f. Whether Plaintiff and the Class are entitled to money damages under the same causes of action as the other Class Members.

52. Typicality: Plaintiff is a member of the Class. Plaintiff's claims are typical of the claims of each Class Member in that every member of the Class was susceptible to the same deceptive, misleading conduct and purchased Defendant's Products. Plaintiff is entitled to relief under the same causes of action as the other Class Members.

53. Adequacy: Plaintiff is an adequate Class representative because her interests do not conflict with the interests of the Class Members she seeks to represent; her consumer fraud claims are common to all members of the Class and she has a strong interest in vindicating her rights; she has retained counsel competent and experienced in complex class action litigation and they intend to vigorously prosecute this action.

54. Predominance: Pursuant to Rule 23(b)(3), common issues of law and fact identified above predominate over any other questions affecting only individual members of the Class. The Class issues fully predominate over any individual issue because no inquiry into individual conduct is necessary; all that is required is a narrow focus on Defendant's deceptive and misleading marketing and labeling practices.

55. Superiority: A class action is superior to the other available methods for the fair and efficient adjudication of this controversy because:

- a. The joinder of thousands of individual Class Members is impracticable, cumbersome, unduly burdensome, and a waste of judicial and/or litigation resources;
- b. The individual claims of the Class Members may be relatively modest compared with the expense of litigating the claim, thereby making it impracticable, unduly

burdensome, and expensive—if not totally impossible—to justify individual actions;

- c. When Defendant's liability has been adjudicated, all Class Members' claims can be determined by the Court and administered efficiently in a manner far less burdensome and expensive than if it were attempted through filing, discovery, and trial of all individual cases;
- d. This class action will promote orderly, efficient, expeditious, and appropriate adjudication and administration of Class claims;
- e. Plaintiff knows of no difficulty to be encountered in the management of this action that would preclude its maintenance as a class action;
- f. This class action will assure uniformity of decisions among Class Members;
- g. The Class is readily definable and prosecution of this action as a class action will eliminate the possibility of repetitious litigation;
- h. Class Members' interests in individually controlling the prosecution of separate actions is outweighed by their interest in efficient resolution by single class action; and
- i. It would be desirable to concentrate in this single venue the litigation of all plaintiffs who were induced by Defendant's uniform false advertising to purchase its Products as "100% Natural."

56. Accordingly, this Class is properly brought and should be maintained as a class action under Rule 23(b)(3) because questions of law or fact common to Class Members

predominate over any questions affecting only individual members, and because a class action is superior to other available methods for fairly and efficiently adjudicating this controversy.

INJUNCTIVE CLASS RELIEF

57. Rules 23(b)(1) and (2) contemplate a class action for purposes of seeking class-wide injunctive relief. Here, Defendant has engaged in conduct resulting in misleading consumers about ingredients in its Products. Since Defendant's conduct has been uniformly directed at all consumers in the United States, and the conduct continues presently, injunctive relief on a class-wide basis is a viable and suitable solution to remedy Defendant's continuing misconduct. Plaintiff would purchase the Products again if the ingredients were changed so that they indeed were "100% Natural."

58. The injunctive Class is properly brought and should be maintained as a class action under Rule 23(a), satisfying the class action prerequisites of numerosity, commonality, typicality, and adequacy because:

- a. Numerosity: Individual joinder of the injunctive Class Members would be wholly impracticable. Defendant's Products have been purchased by thousands of people throughout the United States;
- b. Commonality: Questions of law and fact are common to members of the Class. Defendant's misconduct was uniformly directed at all consumers. Thus, all members of the Class have a common cause against Defendant to stop its misleading conduct through an injunction. Since the issues presented by this injunctive Class deal exclusively with Defendant's misconduct, resolution of these

questions would necessarily be common to the entire Class. Moreover, there are common questions of law and fact inherent in the resolution of the proposed injunctive class, including, *inter alia*:

- i. Resolution of the issues presented in the 23(b)(3) class;
 - ii. Whether members of the Class will continue to suffer harm by virtue of Defendant's deceptive product marketing and labeling; and
 - iii. Whether, on equitable grounds, Defendant should be prevented from continuing to deceptively mislabel its Products as "100% Natural."
- c. Typicality: Plaintiff's claims are typical of the claims of the injunctive Class because her claims arise from the same course of conduct (i.e. Defendant's deceptive and misleading marketing, labeling, and advertising practices). Plaintiff is a typical representative of the Class because, like all members of the injunctive Class, she purchased Defendant's Products which were sold unfairly and deceptively to consumers throughout the United States.
- d. Adequacy: Plaintiff will fairly and adequately represent and protect the interests of the injunctive Class. Her consumer protection claims are common to all members of the injunctive Class and she has a strong interest in vindicating her rights. In addition, Plaintiff and the Class are represented by counsel who is competent and experienced in both consumer protection and class action litigation.

59. The injunctive Class is properly brought and should be maintained as a class action under Rule 23(b)(2) because Plaintiff seeks injunctive relief on behalf of the Class Members on

grounds generally applicable to the entire injunctive Class. Certification under Rule 23(b)(2) is appropriate because Defendant has acted or refused to act in a manner that applies generally to the injunctive Class (i.e. Defendant has marketed its Products using the same misleading and deceptive labeling to all of the Class Members). Any final injunctive relief or declaratory relief would benefit the entire injunctive Class as Defendant would be prevented from continuing its misleading and deceptive marketing practices and would be required to honestly disclose to consumers the nature of the contents of its Products. Plaintiff would purchase the Products again if the ingredients were changed so that they indeed are “100% Natural.”

FIRST CAUSE OF ACTION
VIOLATION OF NEW YORK GBL § 349
(On Behalf of Plaintiff and New York Subclass Members)

60. Plaintiff repeats and realleges each and every allegation contained in all the foregoing paragraphs as if fully set forth herein.

61. New York General Business Law Section 349 (“GBL § 349”) declares unlawful “[d]eceptive acts or practices in the conduct of any business, trade, or commerce or in the furnishing of any service in this state.”

62. The conduct of Defendant alleged herein constitutes recurring, “unlawful” deceptive acts and practices in violation of GBL § 349, and as such, Plaintiff and the New York Subclass Members seek monetary damages and the entry of preliminary and permanent injunctive relief against Defendant, enjoining them from inaccurately describing, labeling, marketing, and promoting the Products.

63. There is no adequate remedy at law.

64. Defendant misleadingly, inaccurately, and deceptively advertise and market its Products to consumers.

65. Defendant's improper consumer-oriented conduct—including labeling and advertising the Products as being “100% Natural”—is misleading in a material way in that it, *inter alia*, induced Plaintiff and the New York Subclass Members to purchase and pay a premium for Defendant's Products and to use the Products when they otherwise would not have. Defendant made its untrue and/or misleading statements and representations willfully, wantonly, and with reckless disregard for the truth.

66. Plaintiff and the New York Subclass Members have been injured inasmuch as they paid a premium for products that were—contrary to Defendant's representations—not “100% Natural.” Accordingly, Plaintiff and the New York Subclass Members received less than what they bargained and/or paid for.

67. Defendant’s advertising and Products’ packaging and labeling induced Plaintiff and the New York Subclass Members to buy Defendant’s Products and to pay a premium price for them.

68. Defendant’s deceptive and misleading practices constitute a deceptive act and practice in the conduct of business in violation of New York General Business Law §349(a) and Plaintiff and the New York Subclass Members have been damaged thereby.

69. As a result of Defendant’s recurring, “unlawful” deceptive acts and practices, Plaintiff and the New York Subclass Members are entitled to monetary, compensatory, treble and

punitive damages, injunctive relief, restitution and disgorgement of all moneys obtained by means of Defendant's unlawful conduct, interest, and attorneys' fees and costs.

SECOND CAUSE OF ACTION
VIOLATION OF NEW YORK GBL § 350
(On Behalf of Plaintiff and the New York Subclass Members)

70. Plaintiff repeats and realleges each and every allegation contained in all the foregoing paragraphs as if fully set forth herein.

71. N.Y. Gen. Bus. Law § 350 provides, in part, as follows:

False advertising in the conduct of any business, trade or commerce or in the furnishing of any service in this state is hereby declared unlawful.

72. N.Y. Gen. Bus. Law § 350a(1) provides, in part, as follows:

The term 'false advertising, including labeling, of a commodity, or of the kind, character, terms or conditions of any employment opportunity if such advertising is misleading in a material respect. In determining whether any advertising is misleading, there shall be taken into account (among other things) not only representations made by statement, word, design, device, sound or any combination thereof, but also the extent to which the advertising fails to reveal facts material in the light of such representations with respect to the commodity or employment to which the advertising relates under the conditions proscribed in said advertisement, or under such conditions as are customary or usual . . .

73. Defendant's labeling and advertisements contain untrue and materially misleading statements concerning Defendant's Products inasmuch as they misrepresent that the Products are "100% Natural."

74. Plaintiff and the New York Subclass Members have been injured inasmuch as they relied upon the labeling, packaging and advertising and paid a premium for the Products which

were—contrary to Defendant’s representations—not “100% Natural.” Accordingly, Plaintiff and the New York Subclass Members received less than what they bargained and/or paid for.

75. Defendant’s advertising, packaging and Products’ labeling induced Plaintiff and the New York Subclass Members to buy Defendant’s Products.

76. Defendant made its untrue and/or misleading statements and representations willfully, wantonly, and with reckless disregard for the truth.

77. Defendant’s conduct constitutes multiple, separate violations of N.Y. Gen. Bus. Law § 350.

78. Defendant made the material misrepresentations described in this Complaint in Defendant’s advertising, and on the Products’ packaging and labeling.

79. Defendant’s material misrepresentations were substantially uniform in content, presentation, and impact upon consumers at large. Moreover, all consumers purchasing the Products were and continue to be exposed to Defendant’s material misrepresentations.

80. As a result of Defendant’s recurring, “unlawful” deceptive acts and practices, Plaintiff and New York Subclass Members are entitled to monetary, compensatory, treble and punitive damages, injunctive relief, restitution and disgorgement of all moneys obtained by means of Defendant’s unlawful conduct, interest, and attorneys’ fees and costs.

THIRD CAUSE OF ACTION
COMMON LAW UNJUST ENRICHMENT
(On Behalf of Plaintiff and All Class Members in the Alternative)

81. Plaintiff repeats and realleges each and every allegation contained in the foregoing paragraphs as if fully set forth herein.

82. Plaintiff, on behalf of herself and consumers nationwide, bring a common law claim for unjust enrichment.

83. Defendant's conduct violated, inter alia, state and federal law by manufacturing, advertising, marketing, and selling its Products while misrepresenting and omitting material facts.

84. Defendant's unlawful conduct as described in this Complaint allowed Defendant to knowingly realize substantial revenues from selling its Products at the expense of, and to the detriment or impoverishment of, Plaintiff and Class Members, and to Defendant's benefit and enrichment. Defendant has thereby violated fundamental principles of justice, equity, and good conscience.

85. Plaintiff and Class Members conferred significant financial benefits and paid substantial compensation to Defendant for the Products, which were not as Defendant represented them to be.

86. Under New York's common law principles of unjust enrichment, it is inequitable for Defendant to retain the benefits conferred by Plaintiff's and Class Members' overpayments.

87. Plaintiff and Class Members seek disgorgement of all profits resulting from such overpayments and establishment of a constructive trust from which Plaintiff and Class Members may seek restitution.

JURY DEMAND

Plaintiff demands a trial by jury on all issues.

WHEREFORE, Plaintiff, on behalf of herself and the Class, pray for judgment as follows:

- (a) Declaring this action to be a proper class action and certifying Plaintiff as the representative of the Class under Rule 23 of the FRCP;
- (b) Entering preliminary and permanent injunctive relief against Defendant, directing Defendant to correct its practices and to comply with consumer protection statutes nationwide, including New York consumer protection laws;
- (c) Awarding monetary damages, including treble damages;
- (d) Awarding punitive damages;
- (e) Awarding Plaintiff and Class Members their costs and expenses incurred in this action, including reasonable allowance of fees for Plaintiff's attorneys and experts, and reimbursement of Plaintiff's expenses; and
- (f) Granting such other and further relief as the Court may deem just and proper.
